PROFILE

Third-year BCA student and Full-Stack Software Engineering intern with hands-on experience developing RESTful APIs, Node.js/Express backend services, React/TypeScript user interfaces, and MongoDB database solutions. Active open-source contributor and builder of developer-focused AI tools (GitFix), experienced in utilizing AI coding assistants to accelerate debugging, API integration, and full-stack software delivery without compromising code quality.

EXPERIENCE

Neximprove

Frontend Developer Intern | *6* Months *(*Completed*)*

- Worked with Next.js to develop responsive web applications and UI components. ● Certificate: View Certificate

Full Stack Developer Intern | *2* Months – Present

- Engineered scalable full-stack web applications by applying modern software engineering principles, optimized data structures, and secure JWT authentication across the MERN stack and Next.js.

SKILLS

Core Engineering & Languages: Data Structures & Algorithms, Object-Oriented Programming (OOP), JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, Bootstrap, AJAX

Backend & Databases: Node.js, Express.js, REST APIs, GraphQL, Socket.io, JWT Authentication, MongoDB, Mongoose, Azure SQL, PostgreSQL,Supabase

Tools & Practices: Git, GitHub, Postman, VS Code, CI/CD Basics, Docker Basics, Agile/Scrum, Unit Testing, System Design Basics

Certification: Git & GitHub (Coursera): **link**

Prompt Engineering : link

EDUCATION

Bachelor of Computer Application | Eternal University, Baru Sahib | July 2024 – Present

Bachelor of Art (English Honours) | Medininagar, Jharkhand | July 2020 – December 2024

PROJECTS

Neighbourhood Helper | Website

Technologies*: React.js,* Redux, JavaScript, Node.js, Express.js, MongoDB, Socket.io, REST APIs, JWT, Tailwind CSS

Architected a real-time collaborative platform emphasizing clean system design, state management, and efficient data flow. Leveraged WebSockets (Socket.io) for low-latency event synchronization and implemented secure token-based authentication with high availability across frontend and backend services.

ZaikaHub | React • React Router • REST API • Netlify Built a responsive recipe discovery web app with dynamic client-side routing and asynchronous REST API data retrieval.
